

Welcome to Apex Automation and Robotics

Apex Automation and Robotics is an Australian company specialising in the design and manufacture of custom-built automation machines and robotic systems. Our engineers and project managers have up to 20 years experience in their fields and have installed over 50 systems including 12 robotic cells. The majority of these projects were full turnkey systems, developed from concept incorporating mechanical and electrical design and software development by our engineers.

Our Mission Our mission at Apex Automation and Robotics is to embrace technology and provide our customers with automation solutions that give them a competitive edge by:

- Increasing their productivity
- Increasing product quality
- Reducing production costs

In order to achieve this, we will:

- Work closely with our customer to fully appreciate their requirements
- Combine our experience and skills with the use of proven technologies to derive a custom-tailored automation solution
- Demonstrate the benefits of the proposed concept and develop the customer's confidence and trust
- Turn the concept into a reliable thoroughly engineered system, managed every step of the way
- Carry out risk analysis to ensure that the system is safe and conforms to the relevant standards
- Fully test all equipment before we deliver and install on time
- Provide extensive training, documentation and on-going technical support to make the transition for the customer as smooth as possible
