

Plastics industry

Apex Automation and Robotics is one of the leading suppliers of automation machines for the plastics industry. Over the years, we have developed a range of products for this industry, including robotic systems to handle unstable bottles and containers with complex packing and palletising configurations.

The key features of our machines are:

- Flexibility - they handle a wide variety of products
- Reliability - designed for 24/7 operations
- Safety - guarded according to the relevant safety standards such as AS 4024, EN 292 and EN 1050

We offer the following automation machines for the plastics industry:

- > Automatic Palletisers
- > Automatic Baggers
- > Robotic packing and palletising
- > Automatic Depalletisers

In addition to these products, Apex Automation and Robotics provides custom designed automation solutions.
